Description: A New York Times Bestseller Do fishes think? Do they really have three-second memories? And can they recognize the humans who peer back at them from above the surface of the water? In What a Fish Knows, the myth-busting ethologist Jonathan Balcombe addresses these questions and more, taking us under the sea, through streams and estuaries, and to the...

Review: Who would have thought that reading about fishes could be so entertaining and educational? After all, I was taught to believe that a fish is a fish is a fish is a fish, ... just automatons peddling water waiting for food and sex, sex and food, food and sex, until they become food to other fishes. Other than different colors and shapes, their lives were...
